PILGRIM: Would you talk about Baba's manifestation? You were saying earlier that you can feel Him.

MEHERJEE: Baba's manifestation? Well, don't you witness now? People, well each one has his own way of. My way of, my thinking is that Baba's manifestation has started now only after He dropped His body. And clearly we see, I personally feel that young people, students or young workers like you people all [inaudible] We who have met Baba, lived with Baba, travelled with Baba and have taken Him as God or Avatar or whatever you call.

But for those of you who have never seen Him, never heard about Him, and all of, and spend considerable amount of money by working hard and come right up to India, go to Baba's tomb, come back to the States, without your sightseeing or shopping or anything, what is this then?

For us it is very difficult to know. This is Baba's manifestation. It is going on, and I personally feel when Baba was physically present, I did not care much about it. I never prayed, meditation leave aside but not prayer even once a day even. And you also. But believe me, after He dropped His body, I feel His presence stronger and stronger and stronger, every day, every minute, every time.

If I don't get sleep at night, travels with Baba or life with Baba comes before my eyes. So I consider this is His manifestation. He is now, His force is now working. At that time it was not so strong. So I consider you people more fortunate than we. We lived with Baba, seen Baba, and accepted Him. You have not and you, perhaps must have been in your past life with Him so you do not have the necessity of having Him physically with you.
